DETAILED ACTION

1. The Applicant canceled claims 1-20 and added new claims 21-40 as per the "Amendment in Response to Non-final Office Action" received December 15, 2005.

Allowable Subject Matter

2. Claims 21-40 are allowed.

3. The following is an examiner's statement of reasons for allowance:

With respect to the independent claim 21, prior art fails to disclose or make obvious, in combination with other recited features of the claim limitations, a solid state ion gauge for analyzing a sample gas having multiple gas constituents, comprising: a first and a second mutually opposing substrate of semiconductor material separated a predetermined distance so as to form an elongated intermediate gas ionizing cavity region and including an open side inlet for feeding a sample of gas to be analyzed into said gas ionizing cavity region; including a gate electrode located in a space between the source of electrons and the collector of electrons; and first and second magnet elements respectively located on said first and second substrates for generating a magnetic field across and through the gas ionizing region for controlling a travel path of electrons through the ionizing region when generating ions of the gas sample.

The dependent claims 22-40 are allowable by virtue of their dependence upon the independent claim 21.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
